#### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Virgil Marsh on February 23, 2010.

The application has been amended as follows: Amend claim 24 to change "claim 5" in line 1 to "claim 6".

#### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest a thermoformed diaphragm produced from a cast film made from the claimed combination of the polymer of claimed formula and the claimed surfactant. Murata et al. (US Pat. 4,173,701) teaches a diaphragm made from polymer film of the claimed formula. However, the reference does not teach a cast film made with the surfactant of the claimed formula. While cast films of polyarylates are known (see e.g. Serini et al. (US Pat. 4,654,411)), there is nothing in the prior art of record to suggest using the specific surfactants in a cast film. The original specification teaches that the addition of the non-ionic polyol surfactant reduces the dead zones in the speaker (page 9). There is nothing in the prior art of record to teach or suggest that this effect will result from the use of the specific surfactant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
